

Dear Elected officials,

I strongly oppose this proposal.

Although increasing affordable housing offer is a valid goal, it should not be pursued without properly evaluating and managing its impact on other equally rightful concerns (e.g. environmental impact, public services capacity). Developing the feasibility studies, plans and budgets to properly address the effects of increasing building density is a must.

Particular consideration must be given to the potential loss of value of properties arising from this proposed government action.

Announcing this bill last Wednesday and having the hearing Monday is not exactly a sign of adequate due diligence.

I urge you to vote NO.

Sincerely,  
Ricardo Ortega  
Westport resident
